## PREMIUM HARDWOOD FLOORING

### LED HARDWAX OIL FINISH

NEW!

Rehmeier Wood Floor is now offering a prefinished flooring with the revolutionary Vesting LED-HardWax Oil containing a unique mix of oils, waxes, resins and additives. Because of this, the oil cures and hardens in a split second when it comes into contact with LED-light. When finished, the wood surface is instantly resilient and protected against dirt and moisture.

Vesting LED-HardWax Oil will make the colors of your floor significantly richer and deeper. Suitable for high traffic areas and also for project-based use because of its highly wear-resistance.

#### WHY HARDWAX OIL?

- Dirt and moisture repellent, highly resistant to chemicals
- Provides deep coloring of the wood surface as well as on previously applied stains
- \*LED-light cures the wood within seconds. The LED-HardWax Oil hardens instantly and cures completely when exposed to LED lighting. The floor has an optimal load-bearing capacity immediately after treatment. No harmful U.V. light, very low drying temperature and environmentally friendly.

#### ASSORTED COLORS:

- Natural
- Soft White
- Natural White
- White
- Creamy White
- Soft Grey
- Grey
- Smoked
- English Color
- Abbey Brown
- Chocolate
- Sand
- Black
